

**COPINAT ULTRA**

**CPC | VILOFOSS®**

# Why supplement?

Colibacillosis is a very common disease in poultry and the use of efficient natural products appears as an increasingly necessary alternative, considering the current legislation on the use of medicines

## Product properties

Copinat is a complementary feed specifically formulated based on essential natural oils.

## ADVANTAGES

A carefully formulated composition allows a solution to nonspecific pathological problems.

- Bactericidal action against Gram-negative bacteria
- Fast spread in blood
- Regulation of intestinal flora
- Improvement in production rates
- A withdrawal period in eggs or meat is not needed

CPC | VILOFOSS®

# Use directions

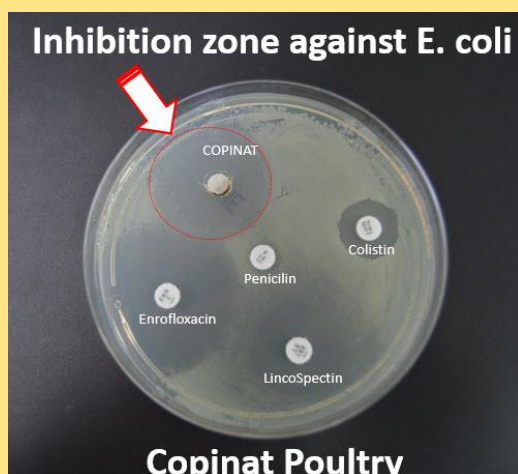

Incorporate into the feed between 2 and 10 kg per each 1000 kg.

As regulator of intestinal flora or in mild pathological problems:

2 kg / 1000 kg feed.

Persists hygienic and unalterable for a long period.

Can be used jointly in a previous premix with other premixes or complementary feed.
